JOB DESCRIPTION <i>This template is for use in an ASET C.Tech. or C.E.T. application; a sample job description is located on the next page.</i>			
Employer's Name:	Hi-Tech Precision Products Ltd.	Duration of Employment:	Sep 1994 – Jun 1995
Position/Title:	R&D Electronic Engineer		
Duties and Responsibilities: (Be descriptive of your duties and responsibilities for this position; they should reflect the activities listed under the technician (C.Tech.) or technologist (C.E.T.) as well, this job description supports the content within the competency summary.)			
Role Overview: During his employment at Hi-Tech Precision Products Ltd., Mr. Tai worked in an early-career R&D Electronic Engineer role, supporting OEM consumer-electronics product development. He worked under the supervision of the engineering department head and a contract-based chief electronic engineer, with my direct supervision focused on audio performance testing, validation, technical documentation support, and noise-reduction improvement activities. Engineering Duties and Responsibilities: - Supported Sony and Sansui OEM CD Player, CD-Graphic, and CD-Changer product development through R&D and project-engineering support activities, following established engineering procedures and work instructions. - Performed audio performance and noise testing, including measurement, verification, and comparison against defined OEM requirements and internal test procedures; recorded test results to support design verification and production readiness. - Assisted with the preparation and review of BOMs, engineering specifications, and technical documentation, ensuring completeness, accuracy, and traceability in accordance with project requirements. - Assisted with firmware and software testing, component assessment, and safety sample evaluation, supporting pilot builds and readiness reviews under senior engineer supervision. - Supported noise-reduction and audio-performance improvement activities by analyzing test data, identifying deviations, and communicating findings and observations to the supervising chief engineer for corrective action. - Contributed to engineering change and cost-reduction support activities, including assistance with updates to main, front-panel, and power PCB assemblies under senior engineer direction. - Provided technical coordination and collaboration support by liaising with internal engineers, suppliers, and OEM client teams, and assisted with limited UI/UX-related development coordination, including on-screen menu updates and basic usability reviews, under supervision.
