JOB DESCRIPTION

This template is for use in an ASET C.Tech. or C.E.T. application; a sample job description is located on the next page.

Employer's Name:	Wai Kai Electronics Ltd.	Duration of Employment:	April 1996 – September 1999
------------------	--------------------------	-------------------------	-----------------------------

Position/Title:	Manager - Project Engineering & OEM Programs
-----------------	--

Duties and Responsibilities: (Be descriptive of your duties and responsibilities for this position; they should reflect the activities listed under the [technician \(C.Tech.\)](#) or [technologist \(C.E.T.\)](#) as well, this job description supports the content within the competency summary.)

Overview:

Mr. Pik Fung Tai (Francis) worked as Manager – Project Engineering & OEM Programs on Sanyo and Daewoo portable VCD player OEM programs at Wai Kai Electronics Limited from April 1996 to September 1999. During this period, he supported project engineering and OEM coordination activities related to product development and manufacturing readiness.

Technical Duties and Responsibilities

- Provided cross-functional project and product-development coordination with engineering, suppliers, chipset vendors, OEM clients, and manufacturing teams to support product development and manufacturing readiness.
- Reviewed and coordinated technical requirements, engineering specifications, BOMs, and technical documentation; supported project tracking and BOM cost alignment to ensure technical and commercial feasibility.
- Supported hardware, software, and firmware development collaboration by interfacing with chipset vendors, Panasonic MPEG engineering teams, Sanyo loader and servo-IC suppliers, and external engineering partners to support system integration and issue resolution.
- Assisted with test data review, pilot-run evaluation, and production-readiness assessment; applied project coordination practices including development scheduling, progress tracking, compliance and safety support, and technical documentation and production handover to manufacturing.

Summary of Competency

Based on his OEM product-development and project-coordination activities during this period, Mr. Tai demonstrated solid technical competence and professional work practices in electronics product-development coordination, hardware, software, and firmware-related support activities, and OEM project execution, appropriate to an engineering technologist role.
