

Applicant's Name:	Pik Fung Tai	ASET ID:	144xxx
JOB DESCRIPTION <i>This template is for use in an ASET C.Tech. or C.E.T. application; a sample job description is located on the next page.</i>			
Employer's Name:	Woods Global Limited	Duration of Employment:	April 1, 2021–April 30, 2025 (Full Time) May 1, 2025 –Oct 31, 2025 (Part Time)
Position/Title:	Director and Project Manager		
Duties and Responsibilities: (Be descriptive of your duties and responsibilities for this position; they should reflect the activities listed under the <u>technician (C.Tech.)</u> or <u>technologist (C.E.T.)</u> as well, this job description supports the content within the competency summary.)			
Mr. Tai focused on technical, engineering-related, and system-development responsibilities involving mobile application architecture, backend workflow validation, UI/UX evaluation, testing, and system optimization. System & Architecture Review – Evaluated mobile app architecture, backend workflow logic, UI/UX wireframes, and system diagrams to verify alignment with functional specifications, data-flow requirements, and technical constraints. Technical Requirements Analysis – Evaluated system specifications for multi-store e-commerce operations, including end-to-end workflow design, payment-gateway integration logic, dashboard/KPI visualization requirements, and content-management system structure. Mobile Application Development Management – Led technical coordination for iOS and Android development, including UI/UX refinement, backend function mapping, API integration testing, user-journey validation, and version-release preparation. Cross-Platform Testing & Validation – Conducted device compatibility testing, regression testing, functional testing, and technical troubleshooting to ensure stable and consistent performance across iOS and Android environments. Bug Analysis & Quality Control – Investigated defects through error logs, crash logs, and QA reports; performed root-cause analysis; and coordinated corrective and preventive actions with internal and external development teams. Data & System Integrity Management – Ensured accuracy and consistency of product data, pricing logic, order-processing workflows, inventory synchronization, and system configurations across multi-store digital platforms. Risk Management & Compliance – Verified compliance with App Store and Google Play policies, platform security guidelines, privacy requirements, and mobile-application operational standards. UI/UX & Workflow Optimization – Reviewed wireframes and workflow diagrams; optimized user-journey flows; improved navigation speed; and redesigned processing logic to reduce system latency and enhance overall usability. Supplier & Developer Coordination – Coordinated with outsourced R&D teams, UI/UX designers, backend developers, suppliers, and cloud-service partners to deliver technical enhancements, feature updates, and system improvements. Project Management – Led project planning, requirements clarification, scheduling, milestone tracking, progress reporting, and communication for multi-client mobile-app and e-commerce system development projects. Release Management – Prepared release notes, submission packages, certificates, platform documentation, and compliance materials required for Apple App Store and Google Play deployment. Continuous Improvement – Conducted data-driven performance analysis, reviewed operational KPIs, and implemented continuous-improvement initiatives across digital workflows, technical processes, and system functions.
