

Dale Technical Supporting Documents (selected examples)

(1) Brand: Bang & Olufsen Product: DVB-T receiver/setup box

Supported custom-made firmware development

Production firmware testing

Supported PCB design with head-sink to solve EMC & high temperature issues due to high-frequency on RF chip

Design with test-points and fixture for SMT to improve overall production yield

(2) Brand: AKAI Product: MP4 Digital Photo Frame

Supported firmware/UI upgrade and added FM scanner (radio), alarm and calendar function

Component changed and supported new functions

Guided and supported PCB modifications, adding new functions (FM radio, alarm, and calendar) and resolving EMC issues.
