

Rapid Development & Commercialization of Philips RF Silicon Tuner Platform (DVB-T)

Page No.:1

Public Technology Timeline

Milestone	Date	Evidence	Source URL
Philips introduced next-generation Nexperia DVB platform at CES	Jan 2005	Public announcement	https://phys.org/news/2005-01-philips-showcases-semiconductor-solutions-consumer.html
Philips introduced RF Silicon Tuner (TDA8275)	30 May 2005	Public announcement	https://phys.org/news/2005-05-philips-asus-team-motherboard-tv.html
Philips expanded DVB/STB reference platform	Aug-Sep 2005	Public announcement	https://www.edn.com/philips-unveils-semiconductor-solutions-to-enhance-the-home-of-the-connected-consumer-solutions-at-ifa-2005/
TDA8275A production revision available	Late 2005 / Early 2006	Public announcement	https://www.ixbt.com/monitor/tuners-snr-12.shtml

Dale (HK) Development & Commercialization Evidence

Dale's DVB-T Trial Order for: METRONIC (1st Mass Production)	To: Link Concept Technology Ltd. (Under ACME Group, one of Dale EMS strategic Partner) PO No.: <u>03DP0262</u> Issue Date: 22-May-2006 ETD: 25-Jun-2006 (≈34 days)	Estimated commercialization timeline: approximately six months, based on public Philips technology announcements and internal production evidence.
Dale's DVB-T Trial Order for Elta	To: Link Concept Technology Ltd. PO No.: <u>03DP0278</u> Issue Date: <u>20-Jul-2006</u> PO No.: 03DP0278 ETD: 20-Aug-2006 (≈31 days)	- Accelerated manufacturing execution from Purchase Order issuance to Finished Goods ETD within 31–34 days across multiple customer programs. - Coordinated engineering, procurement, suppliers, manufacturing, quality, packaging, logistics, and customer delivery.
Dale's Purchasing Order DVB-T PCB Assembly (SMT Stencil)	PO No.: <u>03DP0278</u> Issue Date: <u>4-Jul-2006</u> ETD: 6-Jul-2006	Modified SMT stencil to improve production yield after 1st mass production
